

The SCX platform is a family of closed center post-pressure compensated sectional valves designed specifically for the construction, material handling, and forestry equipment markets. The SCX platform provides exceptional controllability, efficiency and flexibility for applications requiring 50 to 300 lpm flow rates. Integrated EH control capability has been purpose-designed into this valve family for optimal value. SCX Platform is available in four different sizes SCX 50, SCX 120, SCX 180 and SCX 300.

SCX300

The SCX300 valve series is a closed center, load sense, sectional valve with individual section compensation. The SCX300 series is a precise metering, high performance, and cost-effective solution for a variety of high flow construction, forestry and material handling applications up to 300 lpm.

FEATURES & SPECIFICATIONS

- Flow rate – 300 lpm
- Max pressure – 350 bar (3,625 psi)
- Configuration – sectional
- Circuitry – parallel, closed-center and load-sensing
- Actuation – manual, pilot and electro-hydraulic

OPTIONS

- Load-sense valve
- Unloading valve fused with fixed displacement pumps
- Work port relief with anti-void capability
- Detent float and regen circuitry
- SAE 4-bolt flange ports
- Individual pilot pressure cut-off solenoids
- Low-leak check valve(s) for drift control
- Pressure reducing valve for pilot supply
